Education

University of Houston

B.S. Computer Science, Minor Mathematics

Dec 2023

GPA: 3.80

Experience

Software Engineer – Tenet

May 2023 – Present

Tenet: Tokyo-based social media startup. Joined as an open-source developer in 2022 and transitioned to a full-time role in 2023.

- Collaboratively built a social media web app, translating designs into production code via **Next.js** and **TypeScript**
- Spearheaded accessibility-focussed transition to **MUI**, improving Lighthouse accessibility scores by **30 points**
- Led integration of a data-driven feedback system, utilizing NPS and qualitative survey data to inform product direction
- Automated multiple manual workflows, including CI testing and deploy previews, using **GitHub Actions** and **Vercel**
- Managed many roles, working closely with Engineers and Stakeholders to optimize UX, design, and feature architecture

Software Engineer – Seatgull

Aug 2022 – May 2023

Seatgull: Houston-based startup focused on creating a course management platform for students.

- Created user-facing features for a course management application on a startup team of 6, using **React** and **TypeScript**
- Worked closely with stakeholders to revamp landing page and onboarding, increasing sign-up follow-through by **37%**
- Designed core application experiences using **Figma**, collaborating with CTO and founders to optimize user experience

Software Developer Intern – Freddie Mac

May 2022 – Aug 2022

Freddie Mac: Virginia-based mortgage company. Collaborated closely with Data Scientists and Engineers on ML model development.

- Collaborated on a computer vision project, leveraging **Python** to develop predictive models on large-scale datasets
- Facilitated research, information gathering, and presentation for multiple machine learning workshops
- Self-taught and educated colleagues on key technical topics, including model interpretability, deep learning, and git

Projects

SACNAS UH Website

[GitHub Website](#)

Aug 2022

- Developed a responsive web application for the SACNAS UH student organization via **React**, **JavaScript**, and **CSS**
- Implemented a serverless database leveraging the **Google Sheets API**, enabling no-code updates by administration
- Automated image compression process via **Google Apps Script**, reducing events page network payload by **80%**
- Integrated a user-friendly Google Drive-based CMS solution for writing and publishing articles on the website
- Designed site mockups using **Figma**, incorporating feedback from organization leadership to inform project direction

ZenDecks: Next-gen Flashcards

[GitHub Website](#)

Mar 2023

- Created an open source flashcard app, supporting Markdown and LaTeX, using **React**, **TypeScript**, and **Firebase**
- Integrated **Firebase** for reliable **user authentication** and a scalable database, enabling seamless CRUD functionality
- Utilized **Redux** to manage client-side state and user progress, minimizing Firebase API usage via batch write operations
- Choreographed transitional animations with **Framer Motion**, resulting in a dynamic and responsive user interface

Volunteer Experience

Open Source Developer – Tenet

[GitHub](#)

Nov 2022 – May 2023

- Contributed to a Tokyo-based startup social media platform, utilizing **Next.js**, **TypeScript**, **TailwindCSS**, and **Storybook**
- Implemented key features, including a site-wide dark theme, user settings menu, and notification page using Next.js
- Facilitated transition to server-side data fetching via Next.js, reducing average front-page load time by **45%**

Undergraduate Mentor (Computer Science) – SACNAS UH

Jan 2022 – May 2023

- Organized tech-focused community events and outreach efforts to promote equity of opportunity in STEM fields
- Authored multiple articles on technology career development, guiding underclassmen seeking entry-level experience
- Provided academic guidance and mentorship to students through programming tutoring and interactive workshops

Technical Skills

- **Languages:** TypeScript, JavaScript, HTML, CSS, Python, C++
- **Front-End:** React, Next.js, Redux, MobX, SCSS, TailwindCSS, Material UI (MUI), Storybook, React Testing Library
- **Back-End:** Node.js, Express, MongoDB Atlas, Firebase, MySQL
- **Misc:** Jest, Figma, GitHub Actions, Generative AI (GPT), Google Workspace APIs, Japanese language (JLPT N2 level)
