Houston, TX. | (832)-540-6020 | sharmamitch@gmail.com | mitchellsharma.com | in/mitchell-sharma

Education

University of Houston

B.S. Computer Science, Minor Mathematics

Dec 2023

GPA: 3.80

Experience

Workiva – Software Engineer Intern

May 2023 – Aug 2023

- Contributed key features to internal web app, translating designs into production code via Next.js, TypeScript, and MUI
- Successfully launched a multi-phase project after leading, architecting, and implementing a full-stack feature set
- Automated multiple manual workflows, including Jira ticket creation and deploy previews, improving team efficiency
- Collaborated across domains, working closely with Designers and Engineers on UI, feature architecture, and DevOps

Seagull – Software Engineer

Aug 2022 – May 2023

- Created user-facing features for a course management application on a startup team of 6, using React and TypeScript
- Implemented impactful features and visual components across the application, enhancing usability and functionality
- Utilized Figma to design UI, including a redesigned landing page, improving user experience and engagement rates

Freddie Mac – Software Developer Intern

May 2022 – Aug 2022

- Collaborated on a computer vision project, leveraging Python to develop predictive models on large-scale datasets
- Facilitated research, information gathering, and presentation for multiple machine learning workshops
- Self-taught and educated colleagues on key technical topics, including model interpretability, deep learning, and git

Projects

SACNAS UH Website

[GitHub](#) [Website](#)

Aug 2022 — Present

- Developed a responsive web application for the SACNAS UH student organization via React, JavaScript, and CSS
- Implemented a serverless database leveraging the Google Sheets API, enabling no-code updates by administration
- Automated image compression process via Google Apps Script, reducing events page network payload by 80%
- Integrated a user-friendly Google Drive-based CMS solution for writing and publishing articles on the website
- Designed site mockups using Figma, incorporating feedback from organization leadership to inform project direction

ZenDecks: Next-gen Flashcards

[GitHub](#) [Website](#)

Mar 2023

- Created an open source flashcard app, supporting Markdown and LaTeX, using React, TypeScript, SCSS, and Firebase
- Integrated Firebase for reliable user authentication and a scalable database, enabling seamless CRUD functionality
- Utilized Redux to manage client-side state and user progress, minimizing Firebase API usage via batch write operations
- Choreographed transitional animations with Framer Motion, resulting in a dynamic and responsive user interface.

Translator Discord Bot

[GitHub](#)

Jan 2022

- Built and deployed a translator bot for the UH Japanese Club, interfacing with the Discord chat platform
- Developed features in Python, leveraging the DeepL API for translation, and Discord.py for Discord integrations
- Enabled daily translations for 500+ unique users across 9 Discord servers based in Japan and the United States

Volunteer Experience

Tenet – Open Source Developer

[GitHub](#)

Nov 2022 – Present

- Created an open source social media platform on a team of 6 developers, utilizing Next.js, TypeScript, and Storybook
- Implemented key features, including a site-wide dark theme, user settings menu, and notification page using Next.js
- Facilitated transition to server-side data fetching via Next.js, reducing average front-page load time by 45%

SACNAS UH – Undergraduate Support Officer

Jan 2022 – Present

- Organized tech-focused community events and outreach efforts to promote equity of opportunity in STEM fields
- Authored multiple articles on technology career development, guiding underclassmen seeking entry-level experience
- Provided academic guidance and mentorship to students through programming tutoring and interactive workshops

Technical Skills

- **Languages:** TypeScript, JavaScript, HTML, CSS, Python, C++
- **Front-End:** React, Next.js, Redux, MobX, SCSS, TailwindCSS, Material UI (MUI), Storybook, React Testing Library
- **Back-End:** Node.js, Express, REST, GraphQL, MongoDB Atlas, Firebase, MySQL
- **Misc:** Jest, Figma, Generative AI, Google Workspace APIs, AWS Amplify, Japanese language (JLPT N2 level)
